

PEELABLE COATINGS

PAINT • PROTECT • PEEL

BOAT PROTECT

Protectapeel Boat Protect is a temporary peelable coating used to protect boats and yachts during manufacture, transit and storage.

HOW IT WORKS

Protectapeel is easily and quickly applied to flat, shaped and curved surfaces, using an airless spray gun. The dry film can be easily removed by peeling, leaving surface residue-free. Protectapeel Boat Protect is suitable for internal and external use and is weather resistance up to 12 months. Coverage 3m² per litre. Minimum WFT 300 microns. **This coating CANNOT be used on acrylic surfaces.**

USAGE TIPS

ALWAYS STIR THE PRODUCT BEFORE USE. Before you start spraying, make sure to mask off anything you don't want to coat with Protectapeel. If it's porous, mask it! Do not use on wooden window frames or doors.

OTHER INDUSTRIES USING PROTECTAPEEL

Asbestos
Construction
Glass and Aluminium
Mothballing
Mining/Engineering

Marine
Motor Vehicle
Aircraft
Nuclear
Stadiums

Flooring
Manufacture
Masking
