PAINT • PROTECT • PEEL

CHASSIS PROTECT

Chassis Protect is an acrylic, water-based coating which creates a semi-permanent barrier protecting your vehicle's engine bay, undercarriage and chassis from harsh environments.

ENVIROMENTALLY SAFE

Protectapeel is a water based coating that can be disposed of safely in landfills. (No harmful chemicals).

FORMS A BARRIER RESISTANT TO BOTH MOISTURE PENETRATION AND SALT EXPOSURE

Rust weakens metal, and over time it can compromise the integrity of the frame that holds your entire vehicle together.

HOW IT WORKS

Easy and fast to apply, it forms skin-tight protection. Do not spray any engine components where heat is generated. Easy to repair if damaged (the product bonds to itself). Coverage 5m² per litre. Minimum WFT 250 microns.

OTHER INDUSTRIES USING PROTECTAPEEL

Asbestos Removal
Construction
Glass and Aluminium
Mothballing
Mining and Engineering

Marine
Motor Vehicle
Aircraft
Nuclear
Stadiums

Flooring
Manufacture
Masking
Signage
Chemical Milling

Moisture accumulates in seams and chassis rails causing rust long before you see it. Chassis Protect is designed for external use on exposed surfaces, and electrical components of vehicles, trains, and motorcycles.
